

EXTRIS enters the screen-printing arena

New lean and agile company offers full range of monofilament fabrics

In late 2008 Daniele De Rosa, a well known executive with years of industry experience, MD of a known mesh weaver as well as Chairman of ESMA, founded EXTRIS nearby Como, in the north of Italy. EXTRIS offers a full range of polyester monofilament fabrics to printers for whom the production of stable, professional good quality stencils is of paramount importance. The company is weaving high tenacity polyester fabrics through a small network of independent partners who contribute excellence to each stage of the manufacturing process. The outcome is a polyester fabric performing exactly as any screen-printer would expect it to do. He realised that like many other industrial components fabrics also need to consistently meet a defined list of basic performances. This was the base from which he decided to launch EXTRIS and its 'No Frill Fabric'.

SGIA '08 honoured with Gold 100 Award

Trade Show Executive magazine recognizes SGIA for Expo's impact

The 2008 SGIA Expo (Atlanta, October 15 - 18) was recently honored at the Trade Show Executive Gold 100 Awards and Summit for its positive impact on the specialty imaging industry and on Atlanta - the host city.

Trade Show Executive (TSE) magazine annually honors the top 100 trade shows in the United States based on net square feet of exhibition space, technological innovation, green initiatives, global participation and brand leadership. "SGIA '08 was an extremely successful show for the specialty imaging marketplace," said Michael Robertson, SGIA's

President and CEO. "We are honored to receive this award and look forward to showcasing the most innovative technologies and business solutions next year at the 2010 SGIA Expo in Las Vegas."
